# HELLO,

My name is Motaz! Art of all sorts has happily consumed my life for over a decade. When I was a teenager striving to be a musician, I wanted my online presence to be taken seriously by the industry. In a business where nobody will help you for free, I took matters into my own hands and taught myself graphic design, videography, web design and whatever other creative skills I needed to learn in order to stand out. Fast-forward to present day: my self-driven spirit and unparalleled passion for creating art has led me to creative positions for various companies that are leaders in their industry.

After working with and learning from colleagues whom I have admired over the years, I am eager to take on a position with more responsibilities and even manage a team of artists.
